

ANTO JEROME A

+91 6374390337 | aantojerome@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Developer proficient in Java, SQL, and RESTful APIs, with a strong foundation in cybersecurity and network security. Skilled in Linux, Burp Suite, and Wireshark with a solid understanding of web application security.

SKILLS

Languages	JavaScript, Java, SQL	Databases	PostgreSQL, DynamoDB
Frameworks	Node.js, Express, React, Next.js	Cybersecurity	Burp Suite, Linux, Wireshark

PROFESSIONAL EXPERIENCE

Software Developer Intern - Python Development
Smartail Pvt. Ltd.

Chennai

Aug 2025 – Present

- Developed and implemented a reusable mathematical expression parser for an AI-based grading platform.
- Resolved symbolic parsing issues involving mathematical functions and nested expressions.
- Improved expression evaluation accuracy by integrating structured token-processing logic into the grading engine.

PROJECTS

SentinelAI – AI Surveillance System

[GitHub](#) | [Link](#)

- Real-Time Video Processing & Alerting:** Designed a real-time, multi-tenant AI surveillance system using a modular microservice-style design that processes live RTSP CCTV streams from 10+ cameras simultaneously, performs zone-based object detection, and broadcasts alerts via WebSockets with intelligent escalation (WhatsApp + automated phone calls).
- Event-Driven Architecture:** Established an event-driven detection pipeline with threat scoring, cooldown logic, per-camera alert thresholds, and MongoDB-backed incident persistence, implementing scalable system design principles such as worker isolation, async processing, RESTful APIs, real-time communication, and containerized deployment for production-grade monitoring.

Tech Stack: [React, Node.js, OpenCV, Next.js, Docker, EC2, YOLOv8]

DeepSea AI – Environmental DNA Analysis Platform

[GitHub](#) | [Link](#)

- Biological Sequence Analysis:** Developed a data processing pipeline for analyzing environmental DNA (eDNA) sequence data and identifying different species using deep learning-based classification models.
- AI-Powered Classification Pipeline:** Integrated CNN and BiLSTM models into a modular processing workflow to extract patterns from biological sequence data, while designing reusable components for structured and efficient data processing.

Tech Stack: [Next.js, Express.js, FastAPI, REST API, PostgreSQL/PostGIS, CNN, BiLSTM, Docker]

ACHIEVEMENTS

- Mapathon 2025:** Selected as a notable participant for presenting an innovative GIS-based mapping solution.
- StartupTN Smart Card Recipient:** Recognized for a validated startup idea.

EDUCATION

Bachelor of Technology in Information Technology

St. Joseph's College of Engineering

2023 – Present

CGPA: **7.92 / 10**

Higher Secondary Education

St. Mary's Anglo Indian Higher Secondary School

2023

Percentage: **74%**
